Optional accessories

The NEXI GO 30 SERVER does not include a built-in CD/DVD-ROM drive. If necessary, we recommend ordering an external CD/DVD-ROM in our e-shop.

The NEXI GO server delivers power, stores data, and runs applications for the NEO virtual desktop devices. The NEXI GO server comes pre-installed with the Windows Server 2022 **trial version** and a pre-installed NEXI Board management console. Any technician with a basic knowledge of Windows OS can easily install the teaching applications.

The NEXI GO 30 server has the Windows Server 2022 OS installed, which runs the NEXI Board management console. The NEXI Board management console provides communication between the NEO virtual desktop devices and the server via a LAN network. RDP with graphic acceleration developed directly for the NEO devices is used as the basic two-way communication protocol (it does not require a CPU or large RAM on the terminal; everything takes place on the server). Just like with traditional solutions, every user has his/her own desktop, applications and settings. The NEXI GO solution will suit you if you and your students are using graphically undemanding applications that are compatible with Windows Server 2022 OS.

NEXINEO

WELCOME TO THE FUTURE OF TEACHING

NEXINEO has many **years of experience** in designing and specifying servers for NEXINEO virtualized computer classrooms, which are currently **used by hundreds of schools in Europe**.

NEXI GO servers use high-quality components and therefore feature **long service life and high reliability**. Each NEXI GO server undergoes a thorough stress test before being shipped to the customer.
